² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. COVID 19 HEALTH AND SAFETY SPECIFICATION

Background:

Coronaviruses are a large family of viruses that are found both in humans and animals. Some of these viruses are known to cause illnesses ranging from the common cold to severe respiratory diseases. Coronavirus (COVID-19) was identified in December 2019 in China. COVID-19 infections have spread to other countries in the world. Exposure to Covid-19 may cause flu-like symptoms such as coughing, sneezing, headaches, fever, sore throat and at times affect the lungs and airways of employees. Symptoms can be mild, moderate, severe or fatal.

Coronavirus Disease 2019 (COVID-19) is a respiratory disease caused by the SARS-CoV-2 virus. To reduce the impact of the COVID-19 outbreak conditions on businesses, workers, customers, and the public, all employers need to plan now for COVID-19. For employers who have already planned for influenza outbreaks involving many staff members, planning for COVID-19 may involve updating plans to address the specific sources of exposure, routes of transmission, and other unique characteristics of SARS-CoV-2 (i.e. compared to influenza virus outbreaks).

Introduction

The legislation governing workplaces concerning COVID-19 is the Occupational Health and Safety Act, Act 85 of 1993, as amended, in conjunction with the Hazardous Biological Agents Regulations. Section 8 (1) of the Occupational Health and Safety (OHS) Act, Act 85 of 1993, as amended, require the employer to provide and maintain as far as is reasonably practicable, a working environment that is safe and without risks to the health of employees. Specifically, section 8(2)(b) requires steps such as may be reasonably practicable to eliminate or mitigate any hazard or potential hazard before resorting to Personal Protective Equipment (PPE). However, in the case of COVID-19, a combination of controls are required, although the main principle is to follow the hierarchy of controls.

While engineering and administrative controls are considered more effective in minimizing exposure to SARS-cov-2, PPE may also be needed to prevent certain exposures. While the

correct use of PPE can help prevent some exposures, it should not take the place of other prevention strategies.

This is a risk assessment for dealing with the current COVID-19 situation at the construction site. It may not likely cover all scenarios, therefore, Construction Management should develop Standard Operating Procedures (SOPs) to address all the possible circumstances and make a necessary call in the interest of the health and safety of employees.
